PROJECT

Fascia replacement on both side elevations of the main residence — 100 linear feet total — finished in aluminum: rot-proof, termite-proof, maintenance-free.

1. EXISTING CONDITIONS

The fascia boards on both side elevations of the residence show weather and moisture deterioration. Each side runs approximately 50'-0", for a total of 100 linear feet of fascia to be replaced.

2. SCOPE OF WORK

- 1. **Removal:** Remove the deteriorated fascia boards on both side elevations (2 × 50 LF = 100 LF); haul away and legally dispose of debris.
- 2. **Inspection:** Inspect rafter tails and sub-fascia framing once open. Sound framing remains; any rot or termite damage found is reported to the owner and repaired only under an approved written change order.
- 3. **New fascia:** Install new fascia board and finish with aluminum fascia covering (trim coil / fascia cover) — rot-proof, termite-proof and maintenance-free, consistent with the aluminum work performed on the rest of the property. Color: [White / Dark Bronze — owner's choice].
- 4. **Sealing:** All joints, corners and end caps sealed; drip edge coordinated with the existing roof edge.
- 5. **Closeout:** Final cleanup and walkthrough with owner.

3. PRICE

Item	Amount
Fascia replacement — both side elevations, 100 LF total (2 sides × 50'-0"): removal, new fascia board, aluminum fascia covering, sealing — materials & labor	\$ 1,500.00
TOTAL — MATERIALS & LABOR	\$ 1,500.00

4. TERMS & CONDITIONS

- **Payment:** Due upon completion and owner walkthrough.
- **Schedule:** Approx. 1–2 working days, weather permitting; may be scheduled together with other work at the property to share mobilization.
- **Warranty:** One (1) year on workmanship.

- **Exclusions:** Soffit, gutters, roofing repairs, painting, and repair of rotted rafter tails or framing (quoted by written change order if found).
- Any additional work will be quoted and approved in writing before proceeding (change order).
