PREPARED FOR

Client: Raul [Last Name]
Project Address: 18398 131st Trail N, Jupiter Farms, FL
Phone / Email: [Client Contact]

PROJECT

Deck stair re-treading — replace the weathered, cracked treads on the five (5) step deck stair with new material; existing stringers remain.

1. EXISTING CONDITIONS

The five (5) step wood stair at the deck has treads at the end of their service life — deeply checked, cracked and weathered boards. The stair stringers and supporting structure are in serviceable condition and remain.

2. SCOPE OF WORK

- 1. **Demolition:** Remove the five (5) worn treads; haul away and dispose of debris.
- 2. **Stringer check:** With the treads off, inspect the stringers. If rot is found in the stringer notches, a stair rebuild is quoted separately by written change order before proceeding.
- 3. **New treads:** Install new pressure-treated treads, cut to fit, fastened with exterior-grade structural screws, edges eased and aligned.
- 4. **Closeout:** Walk the stair, verify every tread solid, cleanup.

3. PRICE

Item	Amount
Re-tread five (5) step deck stair — demolition, new pressure-treated treads, fasteners, disposal — materials & labor	\$ 500.00
TOTAL — MATERIALS & LABOR	\$ 500.00

Optional upgrade: composite treads (Trex or equal — never crack, never splinter, no maintenance): **\$650.00 total** instead of \$500.00. Owner's choice at acceptance.

4. TERMS & CONDITIONS

- **Payment:** Due upon completion.
- **Schedule:** Half a working day, scheduled together with other work at the property.
- **Warranty:** One (1) year on workmanship.
- **Exclusions:** Stringers and stair structure (inspected; rebuilt only under written change order if damaged), stair railing, painting/sealing.
