PROJECT

Deck stair re-treading — replace the weathered, cracked treads on both deck stairs (two stairs, five steps each — ten treads total); existing stringers remain.

1. EXISTING CONDITIONS

The two (2) wood deck stairs — five (5) steps each, ten (10) treads total — have treads at the end of their service life: deeply checked, cracked and weathered boards. The stair stringers and supporting structure are in serviceable condition and remain.

2. SCOPE OF WORK

- Demolition:** Remove the ten (10) worn treads on both stairs; haul away and dispose of debris.
- Stringer check:** With the treads off, inspect the stringers of both stairs. If rot is found in the stringer notches, a stair rebuild is quoted separately by written change order before proceeding.
- New treads:** Install new pressure-treated treads, cut to fit, fastened with exterior-grade structural screws, edges eased and aligned.
- Closeout:** Walk the stair, verify every tread solid, cleanup.

3. PRICE

Item	Amount
Re-tread both deck stairs — two (2) stairs × five (5) steps (10 treads) — demolition, new pressure-treated treads, fasteners, disposal — materials & labor	\$ 900.00
TOTAL — MATERIALS & LABOR	\$ 900.00

Optional upgrade: composite treads (Trex or equal — never crack, never splinter, no maintenance): **\$1,200.00 total** instead of \$900.00. Owner's choice at acceptance.

4. TERMS & CONDITIONS

- Payment:** Due upon completion.
- Schedule:** One working day, scheduled together with other work at the property.
- Warranty:** One (1) year on workmanship.

- **Exclusions:** Stringers and stair structure (inspected; rebuilt only under written change order if damaged), stair railing, painting/sealing.
